# Sales Performance Analysis Report

## Project Overview

This report analyzes sales data to evaluate overall business performance, profitability, customer behavior, and regional trends. The objective of this analysis is to identify growth opportunities, improve profit margins, and provide recommendations to support strategic decision-making.

The report focuses on key indicators such as Total Sales, Total Profit, Profit Margin, and Year-over-Year Growth.

## Key Insights

1.The West region generates the highest sales revenue but has a comparatively lower profit margin than other regions.

2.The Technology category is the most profitable segment, while Furniture shows lower margins due to higher discounting.

3.The Top 10 customers contribute approximately 35% of total revenue, highlighting revenue concentration.

4.Discounts above 20% significantly reduce overall profitability, particularly in low-margin categories.

5.Customer churn increased in the final quarter, indicating potential retention issues.

6.The Online sales channel contributes the largest portion of revenue compared to other channels.

## Business Recommendations

Focus marketing and inventory expansion on the Technology category to maximize profitability.
Implement stricter discount control policies, especially in low-margin categories such as Furniture.
Develop customer loyalty programs targeting high-value customers to increase repeat purchases.
Improve customer retention strategies in regions with declining margins.
Optimize pricing strategies based on regional performance analysis.

**Overall, the business demonstrates steady revenue growth; however, optimizing discount strategies and improving customer retention will be critical for long-term profitability.**
